

The CyLex i-DOXSM Service is a complete content management solution with a full range of services included for only pennies per page, per year. Depending on how quickly and how often you want to retrieve your documents, there are a variety of content handling options at pricing levels designed to meet your business needs.

For collaborative capabilities, the CyLex i-DOX Service enables your employees to work together in managing their document content...wherever they are in the world. With powerful indexing features and state-of-the-art library services, the CyLex i-DOX Service takes content management to new levels of performance.

POWERED BY DOCUMENTUM

No matter what kind of content – financial data, engineering drawings, word processing documents, database files – the Documentum 4i engine is designed to handle it smoothly and easily. Documentum's 4iTM platform provides the reliable operation with virtually any file type to let you build your business without any limitations on content.

INTERNET ACCESSIBILITY

One of the strengths of the CyLex i-DOX Service is the worldwide expanse of the Internet, allowing collaboration among employees, suppliers, and business partners – regardless of where they're located. Working together to develop new content is easy and fast: With an Internet connection, moving and managing your content is never difficult. Look for increases in productivity and efficiency.

SECURE AND AVAILABLE

Document security is maintained throughout transmission with the highest level of commercial encryption used today. And the content is safely managed in CyLex Document Vaults hosted by EMC, a world leader in data storage devices. Your critical business information is backed up and protected against natural disasters, broken equipment, networks being down...even accidental erasures. With built-in disaster recovery, content is guaranteed to be safe and available...24 hours a day.

KEY ELEMENTS

- Library Services
- Interlinking of files to multiple users
- Versioning
- Redlining/Annotations
- Renditions
- Full text search, OCR

EASE OF USE

By simply logging onto the CyLex web site and supplying a confidential ID and password, you have access to your secure content at the CyLex Document Vault. Library service features let you check content in and out to prevent the frustrations of down-level content reappearing in your operations. Version and security controls keep documents visible only where you want them seen.

BENEFITS

- One stop – Integrated tool for content management
- Supports all data types
- Worldwide access through the Internet
- No large capital investment – usage based pricing
- Powerful and flexible indexing and searching methods
- Software upgrades included in the service
